

SUMMARY

Backend engineer and data science enthusiast with skills in Python, analytics, and machine learning, seeking opportunities to build impactful and scalable data-driven solutions that make a real impact.

TECHNICAL SKILLS

Languages & Scripts:	Python, C/C++
Data Manipulation:	Pandas, NumPy, Data Wrangling, Data Cleaning, Feature Engineering
Data Visualization:	Matplotlib, Seaborn, Plotly
Machine Learning:	Scikit-learn, Model Deployment, Model Evaluation
Natural Language Processing (NLP):	Text Preprocessing, Sentiment Analysis, Named Entity Recognition (NER), Word Embeddings (Word2Vec), SpaCy
Model Deployment:	Flask API (for serving ML models), Docker, Heroku, Vercel, Streamlit, Netlify
Data Stores:	MySQL, PostgreSQL, MongoDB
Version Control:	Git, GitHub, GitLab
Operating Systems:	Windows, Linux (Ubuntu, Kali Linux), macOS
Tools & Libraries:	Selenium, BeautifulSoup, Jupyter Notebooks, VS Code, Colab

EDUCATION

Year	Degree / Certificate	Institute Name	Percentage
2023 – 2027	B.Tech (3rd Year)	Rajasthan Technical University	Pursuing
2022 – 2023	RBSE Board (Class XII)	Shree Jee School	77.6
2020 – 2021	RBSE Board (Class X)	Shree Jee School	85.0

PROFESSIONAL EXPERIENCE

Internship in AI-Engineer

NudgeBee |Pune, Maharashtra

August 2025 – October 2025

Key Duties:

- Fine-tune the **LLM side** of NudgeBee platform agents for **tracing, logging, metrics**, and **recommendations** to raise accuracy and reduce failure cases.
- Design and run benchmark suites across **Traces, AWS, Logs, GCP, Datadog** agents to find failing scenarios.
- Perform failure analysis and apply targeted fixes – **Feature-signal** improvements, **Model-setting** tweaks and **Prompt-engineering** to make agents handle edge cases better
- Build observability and reporting to **track agent performance** and share results with the team.
- Worked with backend and devops team on **deployments and benchmarking** tasks and wrote **documentation** for benchmark workflows

Internship in Recommendation Engine Development – Machine Learning

The Terracotta Store | Udaipur, Rajasthan

July 2024 – August 2024

Key Duties:

- Analyzed customer needs and business goals to design scalable, efficient **machine-learning algorithm** for **recommendation systems**.
- Built data-preprocessing pipelines in **Pandas** and **NumPy** to clean, transform and **prepare datasets** to feed model
- Created clear dashboards and visualizations with **Matplotlib, Seaborn** and **Plotly** to share model results and insights with stakeholders.
- Worked closely with the **ML** and **data teams** to **integrate model** into the product, **tune performance**, and turn data findings into actionable improvements.

Projects:

→ Intelligent CCTV Surveillance Web Application

- Built an intelligent **CCTV system** for real-time monitoring and automatic detection of people, accidents, etc.
- Created a **Streamlit** web interface with **WebRTC** for live camera viewing and also upload-based analysis.
- Used **YOLO**, **DeepFace** and custom **TensorFlow** models with **OpenCV** to detect objects, helmets and faces accurately and added audio-based analysis with **Librosa** like scream and gunshot detection.
- Implemented alert system like wanted-person and wanted-vehicle, **role-based access** for admins and customers
- Logged every event in MongoDB.

ADDITIONAL ACTIVITIES & RECOGNITION

- Awarded swags at the **Google Arcade event** in recognition of active participation and strong performance
- Solved **750+** problems on **LeetCode**
- Managed the **Nudgebee booth**, representing the company and engaging with attendees
- Participation **Codefiesta 3.0** and **Smart India** Hackathon
- Participation in **Google Developers Group** Seminar Jaipur and **The AI Career & Community** Day Pune
- District **Chess** Winner Award – 2022
- State **Chess** Tournament Participant – 2022
